

Reading: Final Project Submission Guidelines and Deliverables

Estimated Time: 2 minutes

You have completed a series of labs exploring key data science methods and their practical applications. Each lab guided you through understanding how data is collected, prepared, analyzed, and interpreted to support decision-making.

In this final assignment, you will apply your knowledge of the CRISP-DM methodology by defining a real-world business problem and demonstrating how data can be used to develop a solution.

How can you submit the deliverables

You can submit your project deliverables in one of the following ways:

- **Option 1: AI-Graded Submission and Evaluation**
 - Answer all text-based questions in this assignment.
 - Submit your responses for AI-based evaluation.
 - Once submitted, you will receive **automated grades instantly**.
- **Option 2: Peer-Graded Submission and Evaluation**
 - Answer all text-based questions in this assignment.
 - Submit your completed responses for peer review.

In this option, you will receive your grades based on the evaluation from other peers.

*We recommend using **Option 1 for faster grading**. However, if you experience difficulties with this method or cannot access it, you may choose Option 2 instead.*

Note: You are required to choose only one submission option — either AI-Graded or Peer-Graded, and not both, to receive grades for the final assignment.
